#### **DETAILED ACTION**

### Response to Amendment

1. Applicant's election with traverse of Group I (claims 1-6, 8, and 9) and Species IA (claim 1) in Paper No. 7 is acknowledged. The traversal is on the ground(s) that both independent claim 1 of Group I and claim 7 of Group II include similar features. This is not found persuasive because both claims are related as process of making and product made. Since the device of claim 1 can be formed without the step of forming a pillar-shaped spacer, these inventions are distinct. Therefore, the additional search and examination of method of claim 7 would impose a serious burden upon the Examiner. Similarily, since Group I contains claims 1-6, 8, and 9 which are directed to six patentably distinct species as indicated in the previous office action, a serious burden would be imposed upon the Examiner for searching and examining six species.

The requirement is still deemed proper and is therefore made FINAL.

Claims 2-9 are withdrawn from further consideration pursuant to 37 CFR
 1.142(b), as being drawn to a nonelected invention or species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 7.

## Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

<sup>(</sup>e) the invention was described in-

<sup>(1)</sup> an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the

Art Unit: 2871

treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

4. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Kuo (USPN 6,424,397 B1).

As shown in Figs. 4E and 5D, Kuo discloses a liquid crystal display comprising: a first substrate 402 having a first electrode 416b; a second substrate 400 having a second electrode 412 corresponding to a pixel; liquid crystal having negative dielectric anisotropy sealed between the first and second substrates (col. 8, lines 22-26); and a structure which is provided on at least the first substrate to control an alignment of the liquid crystal, wherein the structure on the first substrate has a linear protrusion structure 418, an auxiliary protrusion structure 418a extending from the protrusion structure and opposing to each of facing end portions of the second electrode 412, and a width of the auxiliary protrusion structure wider than a width of the protrusion structure.

### Conclusion

- 5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- 6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thoi V. Duong whose telephone number is (703) 308-3171. The examiner can normally be reached on Monday-Friday from 8:00 am to 4:30 pm.
